Seconded: Councillor Sousa

That the Council of the Municipality of West Elgin hereby adjourn at 5:56pm to meet again at 4:00pm, on September 24, 2026, or at the call of the Chair.

Carried

Taraesa Tellier, Deputy Mayor

Terri Towstiuc, Clerk

Staff Report

Report To: Council Meeting
From: Jeff McArthur, Fire Chief
Date: 2026-09-24
Subject: Surplus Tanker

Recommendation:

That West Elgin Council hereby receives the report regarding a surplus tanker from Jeff McArthur, Fire Chief; And

That Council declares Tanker 92 surplus to its needs and authorizes staff to list it for sale by means of online auction, And

That Council directs the proceeds from the sale for Tanker 92 to the Fire Truck reserve.

Purpose:

The purpose of this report is to provide Council with information regarding Tanker 92 and seeking support to declare apparatus as surplus to its needs.

Background:

The Fire Department received a new tanker apparatus, and it was placed into service at the West Lorne Station on July 1st, 2026. The tanker it replaced, recently known as Tanker 92, served the fire department well over several years; however, is no longer needed.

There is a limited market for used fire apparatus of this age, and many are listed on the GovDeals website which is designed for listing surplus government and municipal assets. The Municipality of West Elgin extensively uses this platform to sell surplus equipment as it provides an unbiased bidding process.

Financial Implications:

Proceeds from the sale from the surplus tanker are recommended to be placed into the West Elgin Fire Truck Reserve.

Respectfully Submitted by,
Jeff McArthur, Fire Chief

Robin Greenall

Staff Report

Report To: Council Meeting
From: Dave Charron, Manager of Infrastructure & Development
Date: 2026-09-24
Subject: Truck Tender Results

Recommendation:

That West Elgin Council hereby receives the report from Dave Charron, Manager of Infrastructure and Development, and That West Elgin Council approve the tender award for the purchase of one (1) fleet vehicle to Oliver Ford for \$57,115.00 plus HST per vehicle.

Purpose:

The purpose of this report is to provide West Elgin Council with information regarding the tender of a fleet vehicle for the Utilities Department.

Background:

The 2026 Budget, as approved by Council, included the purchase of one (1) pickup truck for the Utilities Department. The replacement addressed a van that is currently 12 years old (2014) with an odometer of over 237,000 km. This vehicle was scheduled for replacement with a budget allotment of \$60,000.

The tender was conducted in accordance with the Province of Ontario's Buy Ontario Procurement Directive, which requires municipalities to purchase or lease Made-in-Ontario Fleet Vehicles where available and operationally feasible. Where a Made-in-Ontario vehicle is unavailable or not operationally feasible, the Directive provides for the consideration of vehicles from an Ontario Vehicle Producer, subject to the applicable requirements. The tender requirements reflected these procurement obligations.

The budget allotment was carried over to the 2026 budget. A tender document was published for the purchase of the vehicle on August 20, 2026. On September 4, 2026, West Elgin received one submission. The results of the tender are as follows:

1. Oliver Ford - \$57,115.00 plus HST, made by an Ontario Vehicle Producer.

It is recommended that Council award the contract for the purchase of a pickup truck to Oliver Ford.

Financial Implications:

The bid received in the tendering process was under the approved budget.

Administration can confirm that the anticipated expenditure arising out the recommendation, if adopted by Council through resolution is contained within the 2026 approved budget. As a result,

authorization from Council is an exception to what would otherwise be a Restricted Act, pursuant to section 275(4) of the *Municipal Act, 2001*."

Policies/Legislation:

[West Elgin Procurement Policy](#)

Government of Ontario. (2026). Municipal Buy Ontario Procurement Directive. Issued under the [Buy Ontario Act \(Public Sector Procurement\), 2025. Effective April 13, 2026.](#)

Alignment with Strategic Priorities:

Infrastructure Improvement	Recreation	Economic Development	Community Engagement
☐ To improve West Elgin's infrastructure to support long-term growth.	☐ To provide recreation and leisure activities to attract and retain residents.	☐ To ensure a strong economy that supports growth and maintains a lower cost of living.	☒ To enhance communication with residents.

Respectfully submitted by,

Dave Charron
Manager of Infrastructure and Development

This report and all of its attachments were approved and signed as outlined below:

Robin Greenall

Staff Report

Report To: Council Meeting
From: Dave Charron, Manager of Infrastructure & Development
Date: 2026-09-24
Subject: Chestnut Street and Main Street Reconstruction

Recommendation:

That West Elgin Council hereby receives the report from Dave Charron, Manager of Infrastructure and Development

AND THAT Council directs Administration to award the Chestnut Street and Main Street Reconstruction 2026 contract to ASG Excavating Inc. in the amount of \$5,079,530.74, excluding HST, subject to the execution of the required contract documents and receipt of all required bonds and insurance;

AND THAT the Mayor and Clerk be authorized to execute the necessary agreement and related documents.

Purpose:

The purpose of this report is to seek Council direction to award the Chestnut Street and Main Street Reconstruction contract and to outline the proposed funding sources for the project, including Housing-Enabling Water Systems funding, subdivision development contributions, developer-provided infrastructure, and the Municipality's required contribution.

Background:

The Municipality of West Elgin proceeded with the tendering of the Chestnut Street and Main Street Reconstruction 2026 project, with Spriet Associates London Limited retained as the Municipality's engineering consultant.

The tender closed on September 16, 2026, with six tenders received for consideration.

Spriet Associates has completed its review of the tender submissions and provided a recommendation to award the contract to ASG Excavating Inc. The consultant's recommendation is based on its review of the tender submissions, previous knowledge of the contractor, and positive reference checks.

The consultant's pre-tender cost estimate for the project was \$5,192,000.00, excluding HST.

ASG Excavating Inc.'s tender is therefore \$112,469.26 below the consultant's pre-tender estimate, representing approximately 2.17% below the estimated construction cost.

The second-lowest tender, submitted by Birnam Excavating Ltd., was \$9,118.69 higher than the ASG Excavating Inc. submission.

Contractor	Tender Price – Submitted, Excl. HST	Corrected Price, Excl. HST
ASG Excavating Inc.	\$5,079,530.74	\$5,079,530.74
Birnam Excavating Ltd.	\$5,088,649.43	\$5,088,649.43
PV-EX Construction Ltd.	\$5,205,929.80	\$5,205,929.80
Cassidy Construction London Ltd.	\$5,346,666.10	\$5,346,666.10
Schouten Excavating Inc.	\$6,187,046.39	\$6,228,874.39
GHN Infrastructure Inc.	\$6,190,515.00	\$6,190,515.00

Included in this price is a contingency lines items for a total of \$425,000.

Financial Implications:

The total project funding will be supported through a combination of external funding, development contributions, developer-provided infrastructure, and municipal funding, as follows:

1. Housing-Enabling Water Systems Fund: \$2,898,964.30
2. Elm Street Subdivision Development Contribution: \$708,189.12
3. Arvi Development: Arvi Development will supply and construct the section of pipe that crosses through its property. This work forms part of the overall stormwater system but is not included in the tendered contract amount. The value of this contribution is therefore separate from the contract award.
4. Municipal Contribution: The remaining project cost of \$1,561,777.04, including the Municipality's portion of HST, will be funded through the Municipality.

The above funding sources provide the required financing for the project, with the developer-provided stormwater infrastructure being completed separately from the tendered construction contract.

Administration can confirm that the anticipated expenditure arising out the recommendation, if adopted by Council through resolution and by-law, is contained within the 2026 approved budget. As a result, authorization from Council is an exception to what would otherwise be a Restricted Act, pursuant to section 275(4) of the *Municipal Act, 2001*."

Policies/Legislation:

Rodney, Ontario N0L 2C0

Re: Chestnut Street and Main Street
Reconstruction 2026
Our Job No. 225188 and 225280

We have completed our review of the six (6) tenders submitted on September 16, 2026 for the above noted project. The following is a summary of the tenders as received:

CONTRACTOR	CONTRACT PRICE SUBMITTED (excl. H.S.T.)	CONTRACT PRICE CORRECTED (excl. H.S.T.)
ASG Excavating Inc.	\$ 5,079,530.74	---
Birnam Excavating Ltd.	\$ 5,088,649.43	---
PV-EX Construction Ltd.	\$ 5,205,929.80	---
Cassidy Construction London Ltd.	\$ 5,346,666.10	---
Schouten Excavating Inc.	\$ 6,187,046.39	\$ 6,228,874.39
GHN Infrastructure Inc.	\$ 6,190,515.00	---

Our pre-tender cost estimate for the project was \$ 5,192,000.00 (excl. HST).

All tenders were required to submit the following:

- i) "Bid Deposit" in the amount of 10% of the Tender Price.
- ii) 100% Performance Bond.
- iii) 50% Labour and Material Bond.
- iv) Form of Tender Statements 'A' to 'D'.
- v) Acknowledged Addendum No. 1, No. 2, and No. 3
- vi) Buy Ontario Form.

The submission by Schouten Excavating Inc. included mathematical errors which are noted in the tabulation above.

Based on the above, as well as our past knowledge and positive reference checks for ASG Excavating Inc., we recommend that this contract be awarded to ASG Excavating Inc.

It is our pleasure to be of service.

Yours truly,

SPRIET ASSOCIATES LONDON LIMITED

Chris Lierman, P. Eng.

CSL:

Staff Report

Report To: Council Meeting
From: Terri Towstiuc, Manager of Community Services/Clerk
Date: 2026-09-24
Subject: Request for Fee Waivers at the Rodney Recreation Center

Recommendation:

That West Elgin Council hereby receives the report from Terri Towstiuc, Manager of Community Services/Clerk Re: Request for Fee Waivers at the Rodney Recreation Centre; And

That That Council approve the waiver of applicable Rodney Recreation Centre rental fees for the two scheduled youth PA Day programs and the annual Breakfast with Santa event, including requested set-up access on the day prior to the Breakfast with Santa event, subject to all applicable municipal facility, insurance and booking requirements.

Purpose:

The purpose of this report is to seek Council approval to waive rental fees for the Rodney Recreation Centre for three community programming dates: two youth PA Day programs and the annual Breakfast with Santa event. The requested fee waivers are intended to support accessible, no-cost community programming for local children and families.

Background:

The Municipality, in partnership with West Elgin Community Health Centre (WECHC) staff, is supporting the delivery of consistent PA Day programming for youth. Two sessions are proposed to be held at the Rodney Recreation Centre on October 26, 2026, and April 16, 2027. Programming is expected to operate in a day-camp format and include a variety of indoor and outdoor activities, with a focus on creative arts and physical activity. The sessions are intended for youth aged 10 to 13, with approximately 15 spaces available per session.

The programs will be coordinated by WECHC staff with support from the Municipal Recreation Coordinator and older student volunteers. The anticipated programming hours are approximately 9:00 a.m. to 3:00 p.m., with final hours to be confirmed prior to registration. Waiving the facility rental fees would assist in allowing the PA Day programs to be offered to participating families at no cost.

Additionally, the annual Breakfast with Santa event is scheduled for Saturday, November 28, 2026, at the Rodney Recreation Centre. The event is organized by community partners and local groups and has historically rotated between locations in West Elgin and Dutton Dunwich. Rodney is scheduled to host the event this year.

The event is expected to require facility access from approximately 7:00 a.m. to 3:00 p.m. for set-up, the event, clean-up and take-down. The organizing committee has also requested access to the facility on the preceding day to begin set-up. Rental fees for the Rodney Recreation Centre have been waived for this event in previous years. Waiving the fees would help the organizers continue to provide the event at no cost to local families and direct available event resources toward food and programming.

Financial Implications:

Approval of the requested fee waivers would result in foregone facility rental and related revenue. Based on the amounts provided for the proposed bookings, the estimated value of the requested waivers is as follows:

Program/Event	Dates	Estimated Fee Waiver
Youth PA Day Programs	October 26 and April 16	\$1,264.00
Breakfast with Santa	November 28, including requested prior-day set-up access	\$669.50
Total Estimated Value		\$1,933.50

Note: The amounts above reflect the fee totals contained in the original request. Any applicable insurance, tax or booking requirements would continue to be administered in accordance with municipal requirements.

Policies/Legislation:

Fees & Charges By-law

Alignment with Strategic Priorities:

Infrastructure Improvement	Recreation	Economic Development	Community Engagement
☐ To improve West Elgin's infrastructure to support long-term growth.	☒ To provide recreation and leisure activities to attract and retain residents.	☐ To ensure a strong economy that supports growth and maintains a lower cost of living.	☒ To enhance communication with residents.

Staff Report

Report To: Council Meeting

From: Terri Towstiuc, Manager of Community Services/Clerk

Date: 2026-09-24

Subject: Community Sport and Recreation Infrastructure Fund (CSRIF) Stream 1

Recommendation:

That West Elgin Council hereby receives the report from Terri Towstiuc, Manager of Community Services/Clerk regarding the Community Sport and Recreation Infrastructure Fund (CSRIF) – Stream 1: Repair and Rehabilitation 2026–2029; And

That Council direct staff to proceed with an application under the Community Sport and Recreation Infrastructure Fund – Stream 1 for the previously planned renovations to the Bo Horvat Community Centre, to be prepared and submitted through Transfer Payment Ontario prior to the December 22, 2026, deadline.

Purpose:

The purpose of this report is to advise Council of the current [Community Sport and Recreation Infrastructure Fund \(CSRIF\) – Stream 1: Repair and Rehabilitation](#) funding opportunity and seek direction regarding the municipal recreation project to be submitted.

The current funding opportunity follows previous efforts by the Municipality to secure senior government funding for renovations to the Bo Horvat Community Centre. Most recently, Council received a staff report on July 16, 2026, regarding an application to the federal Build Communities Strong Fund – Local Impact Stream for a comprehensive arena renovation project.

With the opening of a new CSRIF intake, Council now has an additional opportunity to consider the arena project or identify another municipal recreation facility as a priority for provincial funding.

Background:

The Community Sport and Recreation Infrastructure Fund (CSRIF) is a capital funding program delivered by the Ontario Ministry of Sport. Its purpose is to revitalize existing community sport and recreation infrastructure and support the construction of new facilities across Ontario.

CSRIF consists of two streams: Stream 1 – Repair and Rehabilitation and Stream 2 – New Builds/Signature New Builds. The current Stream 1 intake is intended to extend the lifespan of existing community sport and recreation facilities and improve programming, accessibility, and functionality.

In September 2024, Council directed staff to apply under the Community Sport and Recreation Infrastructure Fund – Stream 1: Repair and Rehabilitation for renovations to the Bo Horvat Community Centre. As part of that application, Spriet Associates was retained to prepare costing and proposed renovation plans.

The proposed project included:

- additional dressing rooms;
- relocation and creation of an appropriate entrance vestibule;
- creation of an accessible family washroom; and
- relocation of the staff office to provide improved visibility within the arena.

The application was submitted prior to the October 29, 2024, deadline. On June 3, 2025, the Ministry of Sport advised the Municipality that the application had been unsuccessful.

The unsuccessful application did, however, result in the Municipality completing a significant amount of the preliminary planning, design and costing necessary to advance the arena project when another suitable funding opportunity became available.

Council received Report on July 16, 2026, which sought authorization to apply to FedDev Ontario for funding toward a comprehensive renovation of the West Elgin Community Centre arena. The proposal was intended to build upon West Elgin's 2023 Kraft Hockeyville investment while completing additional improvements to modernize the facility, improve energy efficiency, enhance accessibility, and extend the useful life of the arena.

The previous report also identified the arena as an important municipal recreation facility supporting organized hockey, public skating, figure skating, school programming, tournaments, and community events.

The Build Communities Strong Fund application represented the Municipality's continued effort to leverage external funding to complete a broader arena modernization rather than relying solely on the municipal tax base. The current CSRIF intake provides another opportunity to advance these previously identified arena improvements.

Eligible projects may include projects that extend the lifespan of existing facilities, maximize use and functionality, improve health and safety, enhance accessibility, or improve environmental performance and energy efficiency. Examples provided by the province include HVAC systems, arena boards and glass, accessible washrooms and expansion or retrofitting of change rooms.

Potential Municipal Projects

Bo Horvat Community Centre – Arena Renovations

The arena project is currently the most advanced of the Municipality's potential projects for this funding opportunity. Unlike, other potential projects, considerable pre-planning has already been completed. Spriet Associates previously prepared renovation plans and costing in support of the 2024 CSRIF application. The project was subsequently reviewed and expanded through the July 16, 2026, Build Communities Strong Fund report.

The Municipality has also continued to invest in the facility. The July report identified recent improvements including installation of a new dehumidification system and replacement of the arena dasher boards, while noting that the Kraft Hockeyville funding remained intact at that time.

The arena can therefore be considered substantially shovel ready compared with other municipal recreation projects. The province specifically considers project readiness—including design work,

expected completion dates, financial and human resources, and project risks—as part of the CSRIF assessment.

Further, the CSRIF guidelines strongly encourage applicants to submit existing feasibility information, facility assessments, detailed designs, evidence of financial resources, quotes, and detailed cost estimates.

The planning already undertaken for the arena therefore provides supporting documentation that could be used to develop the application within the current intake period.

West Elgin Community Pool (Rodney)

The West Elgin Community Pool is another existing municipal recreation facility that could potentially be considered for eligible rehabilitation or renovation work under Stream 1. However, unlike the arena project, there has been no comparable pre-planning completed for a significant pool renovation project. There are currently no detailed renovation plans, engineered designs or comprehensive project costing prepared for the purposes of a CSRIF application.

Further, there is currently no dedicated project reserve identified to provide the required municipal contribution toward a significant pool renovation project.

Should Council wish to prioritize the pool, staff would need to develop the project scope, obtain professional assessments/designs and costing, determine the appropriate long-term investment in the facility, and identify a funding source for the Municipality's share.

Rodney Recreation Centre

The Recreation Centre may similarly represent an opportunity for rehabilitation or improvements, subject to confirmation that the proposed scope meets CSRIF requirements and that the facility meets the program's definition and public-use requirements for a sport or recreation facility.

Currently, there are no significant renovation project has been pre-planned for the Recreation Centre. There are no detailed project plans or cost estimates prepared specifically for this funding opportunity, and no dedicated reserve has been established to provide the Municipality's required contribution. As a result, considerably more preliminary work would be required to advance a Recreation Centre application before the December 22 deadline.

One of the significant differences between the arena and the other two potential facilities is project readiness. The CSRIF assessment gives 30% weighting to Operating/Financial Capacity. Applicants are expected to demonstrate sufficient financial and human resources, comprehensive plans for operating the facility and the capacity to complete the project. The guidelines specifically identify being “shovel ready,” design work, expected completion dates and risk mitigation as evidence of readiness.

Based on work already completed, the arena project has:

- previously prepared plans and designs;
- previous project costing;
- an established renovation scope;
- prior Council consideration and direction;

- previous CSRIF application experience;
- additional project development through the Build Communities Strong Fund application; and
- an established history of capital investment in the facility.

In comparison, the pool and Recreation Centre do not currently have equivalent project plans, costing, or identified reserves. Advancing either alternative would therefore require considerable work between Council's direction and the December 22 application deadline.

Financial Implications:

The CSRIF program requires municipalities to fund at least 50% of eligible project costs when requesting the maximum permitted provincial cost share, and the Municipality is responsible for all ineligible expenses and cost overruns. Staff will prepare the grant application seeking the maximum eligible federal contribution.

Should the application be successful, a future report will be presented to Council outlining:

- Total project costs;
- Confirmed grant funding;
- Municipal contribution;
- Proposed financing strategy; and
- Final project scope.

Submission of an application does not commit the Municipality to proceeding with the project should funding not be approved.

Policies/Legislation:

Alignment with Strategic Priorities:

Infrastructure Improvement	Recreation	Economic Development	Community Engagement
☒ To improve West Elgin's infrastructure to support long-term growth.	☐ To provide recreation and leisure activities to attract and retain residents.	☐ To ensure a strong economy that supports growth and maintains a lower cost of living.	☒ To enhance communication with residents.

Respectfully submitted by,

Terri Towstiuc, Dipl. M.A.
Manager of Community Services/Clerk

THE CORPORATION OF THE TOWN OF PARRY SOUND
RESOLUTION IN COUNCIL

NO. 2026 –

DIVISION LIST

YES NO

DATE: September 1, 2026

Councillor **G. ASHFORD**
Councillor **J. BELESKEY**
Councillor **P. BORNEMAN**
Councillor **B. KEITH**
Councillor **D. McCANN**
Councillor **C. McDONALD**
Mayor **J. McGARVEY**

MOVED BY:

SECONDED BY:

CARRIED: ☒ DEFEATED: ☐ Postponed to: _____

WHEREAS electric kick-style scooters (e-scooters) have become an increasingly popular and affordable form of transportation in Parry Sound and across Ontario; and

WHEREAS e-scooters can provide an accessible, low-emission transportation option and help address transportation needs in communities such as Parry Sound that do not have conventional public transit; and

WHEREAS Ontario's current e-scooter pilot program places responsibility on individual municipalities to determine how e-scooters may operate locally, creating administrative and enforcement challenges, particularly for smaller municipalities with limited resources; and

WHEREAS the continued use of a pilot framework has resulted in uncertainty and inconsistent approaches to e-scooter regulation across the Province.

THEREFORE BE IT RESOLVED that the Council of the Town of Parry Sound requests that the Province of Ontario establish a province-wide regulatory framework for e-scooters that recognizes their unique operating characteristics, maintains appropriate safety standards, and provides municipalities with authority to address local needs; and

FURTHER BE IT RESOLVED that the Town of Parry Sound requests the support of the Association of Municipalities of Ontario (AMO) and the Rural Ontario Municipal Association (ROMA) in advocating for a framework that reduces unnecessary administrative and enforcement burdens on local municipalities; and

FINALLY BE IT RESOLVED that a copy of this resolution be circulated to the Association of Municipalities of Ontario (AMO), the Rural Ontario Municipal Association (ROMA), the Premier of Ontario, Doug Ford, the Minister of Transportation, Prabmeet Singh Sarkaria, Parry Sound-Muskoka MPP, Graydon Smith, and all municipalities across Ontario.

Webinars: New regulation to focus municipal environmental assessment requirements

From EA Modernization (MECP) <EAModernization.MECP@ontario.ca>

Date Wed 9/9/2026 4:38 PM

New regulation to focus municipal environmental assessment requirements ; Preliminary Supporting Document New Regulation for Municipal Projects.pdf;

Good afternoon,

Further to the attached email circulated on August 6, 2026, with respect to the [New regulation to focus municipal environmental assessment requirements](#), the ministry is inviting you to participate in one of the upcoming webinars to learn more about the process that will replace the Municipal Class Environmental Assessment.

We have also attached a supporting document for your reference. More detailed guidance will be made available on the ministry website prior to the implementation date of January 1, 2027.

To register, click on one of the following links. Please note, all sessions will be identical content, and we'd ask that you only register for one to allow for as many participants as possible.

0. [Tuesday, October 6, 2026, 1:30 p.m. to 3:30 p.m. ET](#)
1. [Thursday, October 8, 2026, 10:00 a.m. to 12:00 p.m. ET](#)
2. [Tuesday, October 13, 2026, 10:00 a.m. to 12:00 p.m. ET](#)
3. [Thursday, October 15, 2026, 1:30 p.m. to 3:30 p.m. ET](#)

Note: please register using the email address you intend to log in with on the day of the session as the links you will receive will be unique to the person registering.

Following these sessions, MECP will host a series of additional *Ask Me Anything* sessions later in the fall, with invitations to follow at a later date.

We look forward to seeing you there. If you have any questions, please feel free to reach out to us at eamodernization.mecp@ontario.ca.

Best regards,
EA Modernization Team

What transition rules apply to my project?	15
5. Resources.....	17

This document is intended to provide a preliminary summary of the new regulations only, and the ministry will provide further guidance in advance of the new regulations taking effect. In the event of conflict, the wording in the regulations prevails.

1. Overview

A new regulation under the *Environmental Assessment Act* (EAA) has been made and will take effect on January 1, 2027. Ontario Regulation 258/26, Part II.4 Projects – Requirements for Commencing and Proceeding, will replace the Municipal Class Environmental Assessment (EA) with new requirements for proceeding with certain municipal infrastructure projects.

The regulation applies to:

- Municipalities
- Private sector developers
- Water and Wastewater Public Corporations

Ontario Regulation 50/24 – Designation of Part II.3 and Part II.4 Projects lists the projects that are subject to the EAA and whether they are subject to comprehensive EA requirements (Part II.3) or streamlined EA requirements (Part II.4). Other projects may be subject to a Class EA under Part II.1 of the EAA or one of the other regulations (waste, electricity, or transit). Proponents should review the EAA and all relevant regulations carefully to determine which requirements apply.

Sections 28-29, 31-32, and 34-38 of Ontario Regulation 50/24, as amended, set out the projects that are subject to Part II.4 of the EAA, including the new regulation.

If a proponent determines that a project they are proposing is subject to Part II.4, they must satisfy the applicable requirements set out in O. Reg. 258/26.

The new regulation includes two processes:

- 1) Municipal Project Assessment Process (MPAP)
- 2) Archaeological Assessment Process (AAP)

Both processes include requirements for assessing impacts on the environment, providing notice and publishing documentation of the assessment. If a project is subject to MPAP, then the potential impacts on the environment as broadly defined in the EAA must be assessed. For projects subject to the AAP, only potential impacts to archaeological resources must be assessed.

Following the completion of the relevant process, a waiting period applies. During the waiting period, the Minister of the Environment, Conservation and Parks may issue an order under either process to impose additional requirements (e.g., requiring that additional study be undertaken) or require that a comprehensive EA be prepared. If, after the relevant

waiting period, the Minister has not issued an order and a request for an order has not been made, the proponent may proceed with the project as planned.

Other applicable regulations under the EAA

There are other regulations under the EAA that may apply.

- Ontario Regulation 51/24 – Exemptions, includes a provision exempting shoreline, drinking water and wastewater projects from these requirements where there is an emergency situation.
- Ontario Regulation 53/24 – General and Transitional Matters, sets out the rules that apply during the transition period after the new Part II.4 regulation takes effect. More information on the transition rules can be found in Section 4 of this document.

2. The Municipal Project Assessment Process (MPAP)

Summary of MPAP requirements for commencing a project

The new regulation is a proponent-driven assessment process. Projects subject to the regulation do not require approval by the Minister of the Environment, Conservation and Parks to proceed as long as the requirements of the regulation have been followed by the proponent.

Proponents must complete the following steps for projects that are subject to the MPAP process:

- Obtain a list of Indigenous communities from the ministry for the purpose of notifications and consultation.
- Assess the potential impacts of the proposed project on the environment.
- Identify any mitigation measures and the methods that will be used to verify the effectiveness of each mitigation measure (e.g., monitoring).
- Publish a draft report that includes content that meets the requirements set out in the Regulation and provide notice that the draft report is available. A minimum of 30 days must be provided to interested persons to comment on the draft. The report and the notice must be published on the project website, and the notice must also be:
 - provided to adjacent landowners, Indigenous communities, the Director and any other interested persons or government entities, and
 - published in at least one other method likely to reach interested persons.

- Consult with adjacent landowners, Indigenous communities, government entities and interested persons and provide a response, at least 30 days prior to publishing the final report, directly to anyone who raised a concern during the consultation or the comment period that follows the notice of draft report.
- Publish a final report that meets the content requirements set out in the Regulation and provide notice that the final report is available. The final report and the notice must be published on the project website, and the notice must be provided directly to all persons, communities and entities who were required to be notified of the draft report, as well as any other commenters or interested persons.
- Wait 35 days before proceeding with the project.

Part of this process is time-limited; specifically, the proponent has 120 days – starting with publishing the notice of draft report – to complete the remaining steps up to and including publishing and providing notice of the final report. Should more time be needed, the proponent must publish a notice on the website that identifies the new end-date, outlining why more time is needed and the actions that will be taken to complete the process, and provide a copy of the notice to the ministry.

Summary of MPAP requirements for project changes and 10-year review

The new regulation also includes rules for circumstances in which a proponent may wish or need to make a change to a project after the final report has been published, or in which the proponent has not substantially proceeded with a project within 10 years of the final report being published.

For proposed changes to a project that a proponent wishes to make, the regulation requires that the proponent must determine whether the change is significant, assess the potential impacts of the proposed change on the environment and identify any mitigation measures that may be required to address potential environmental impacts. The documentation and notification requirements for an addendum to the final report vary depending on whether or not the proponent determines that the proposed change is significant.

Similarly, if the project has not substantially proceeded within 10 years of the final report being published, the proponent would need to review the environmental conditions in the project area and determine whether changes need to be made prior to implementation. If so, the proponent would need to follow the requirements for making changes to a project.

Minister's Orders

Under s. 17.31 of the EAA, the Minister has the authority to make certain orders on Part II.4 projects. The Minister may make an order declaring a Part II.4 project to be a Part II.3 project, thus requiring that the proponent undertake a comprehensive EA under Part II.3 of

the EAA. The Minister may also make an order imposing additional requirements on the Part II.4 project (e.g., additional studies, additional consultation). The minister may make these orders on their own initiative or upon the request of a person.

Requests for an order may only be made on the grounds that the order may prevent, mitigate or remedy adverse impacts on the existing Aboriginal and treaty rights of the Aboriginal peoples of Canada as recognized and affirmed in section 35 of the *Constitution Act, 1982*.

What projects does this apply to?

Ontario Regulation 50/24 - Designation of Part II.3 and Part II.4 Projects, identifies which projects are subject to the new regulation and which proponents have requirements for each type of project. The projects that are subject to the MPAP process in Ontario Regulation 258/26 – Requirements for Commencing and Proceeding are set out in sections 28, 31, 34, and 36 of Ontario Regulation 50/24.

Ontario Regulation 50/24 should be reviewed carefully as other processes, if applicable, may apply (e.g., a Class EA, Part II.3) or provide definitions for certain terminology.

Shoreline / In-Water Works Projects

The following projects are subject to MPAP (if they do not trigger Part II.3) when undertaken by a municipality, including where the project is a replacement of an existing thing at a different location:

- Establishing a conveyance system (e.g., channels, swales, ditches) that conveys water from one watercourse to another
- Establishing a dam, other than a coffer dam or rock vortex weir
- Establishing an erosion works (e.g., breakwall) in or along the shoreline of a waterbody

Drinking Water

The following projects are subject to MPAP when undertaken by a municipality, private sector developer or water and wastewater public corporation:

- Establishing a subject* drinking water system that has a rated capacity of greater than 100,000 litres per day (lpd)
- Establishing a drinking water plant that has a rated capacity of greater than 100,000 lpd and is part of a subject* drinking water system

The following projects are subject to MPAP when undertaken by a municipality or water and wastewater public corporation:

- Making a change to a subject* drinking water system where this would result in a new surface water source being used
- Making a change to a subject* drinking water plant that has a capacity greater than 100,000 lpd if the resulting capacity is increasing by at least 50% or by at least 2,275,000 lpd**
- Making a change to a drinking water treatment plant that is part of a subject* system that would bring the rated capacity over 100,000 lpd
- Establishing infrastructure for the purpose of artificially recharging an aquifer from a surface water source for use as drinking water

Sewage

The following projects are subject to MPAP when undertaken by a municipality, private sector developer*** or a water and wastewater public corporation:

- Establishing a sewage system (other than a subsurface sewage system) that has a rated capacity of greater than 100,000 lpd
- Establishing a sewage treatment plant that has a rated capacity of greater than 100,000 lpd
- Establishing a sewage detention facility that provides treatment of sewage and that has a rated capacity of greater than 100,000 lpd (not located at a sewage treatment plant or lagoon facility)
- Establishing a sewage lagoon facility that has a rated capacity of greater than 100,000 lpd or temporarily stores biosolids (not located at a sewage treatment plant, existing lagoon facility, detention facility; and for sewage biosolids lagoon facility, not located at a waste disposal site or organic soil conditioning site).

The following projects are subject to MPAP when undertaken by a municipality or water and wastewater public corporation:

- Making a change to a sewage treatment plant or sewage lagoon facility that would bring the rated over 100,000 lpd¹

¹ The ministry is aware of a cross-referencing error in the amendments to O.Reg. 50/24 that inadvertently designates certain expansions of sewage systems by private sector developers. The ministry intends to fix this error prior to the regulation coming into effect.

- Making a change to a sewage treatment plant that has a capacity greater than 100,000 lpd if the resulting capacity is increasing by more than 50% or by at least 2,275,000 lpd**
- Making a change to a sewage lagoon facility that has a rated capacity of greater than 100,000 lpd and the resulting capacity is increasing by 25% or more

Note, the above designations only apply to sewage works that require an environmental compliance approval under the *Ontario Water Resources Act*.

Storm Water Projects

The following projects are subject to MPAP when undertaken by a municipality or a water and wastewater public corporation:

- Establishing a storm water management works that manages storm water that is contaminated with pollutants (other than total suspended solids, oil, grease and chlorides from roads), uses a chemical or biological treatment or disinfection to treat the storm water, and requires the operator of the facility to be actively involved (also known as an ‘active storm water management facility’)
- Making a change to a storm water management facility that results in it becoming a facility with the characteristics described above

The designations above do not apply if:

- The works discharge to another sewage works;
- The works are required as a condition of approval under the *Planning Act* for a site plan, consent, plan of subdivision or plan of condominium; or
- The works are a demonstration project (i.e the works treat, retain or control storm water or allow infiltration primarily to assist in the design of or assessment or demonstration of the merits of technology or procedures for storm water management).

Notes

*Subject drinking water system means that under the *Safe Drinking Water Act, 2002*, a permit is required to establish the system and a licence is required to use or operate the system.

**Capacity increases are measured against the “comparator rated capacity” which is the greater of either the lowest rated capacity of a plant/facility (as specified by an environmental compliance approval for the plant/facility) in the previous 10-year period, or the rated capacity of the plant used in the most recently completed EA.

*** Sewage projects designated as applicable to private sector are those that provide sewage treatment for private residences.

3. The Archaeological Assessment Process (AAP)

Summary of AAP requirements for commencing a project

The new regulation is a proponent-driven assessment process. Projects subject to the regulations do not require approval by the Minister of the Environment, Conservation and Parks to proceed.

The following steps apply to projects that are subject to the AAP process:

- Proponents must obtain a list of potentially interested Indigenous communities from the ministry
- Proponents may make a ‘preliminary determination’ regarding whether the proposed project area has archaeological potential by using the following checklists that are available through the Ministry of Citizenship and Multiculturalism (MCM)’s website:
 - 1) the “[Criteria for Evaluating Archaeological Potential: A Checklist for the Non-Specialist](#)”, dated November 2015, as may be amended from time to time, and
 - 2) the “[Criteria for Evaluating Marine Archaeological Potential: A Checklist for the Non-Marine Archaeologists](#)”, dated November 2022, as may be amended from time to time.

Using these checklists, as appropriate for the type of project area, a proponent may determine that a project area has archaeological potential. The next steps of the process that a proponent must take will depend on the outcome of that preliminary determination, if completed.

No Archaeological Potential

Where, under the ‘preliminary determination’ step, the proponent determines that the project area does not have potential for archaeological resources, the proponent must:

- publish a draft report that includes a description of the project and a map of the project area, a statement of the determination that the project area does not have archaeological potential and the basis for the determination, including a summary of the information relied on

- provide notice of the draft report to Indigenous communities, the Director, and adjacent landowners, and post the draft report and the notice on the project website
- provide for a minimum of 30 days for review and comment on the draft report by those provided notice of the draft report
- publish a final report including a summary of comments received and an explanation of how the information set out in the final report differs from the draft

The waiting period following the publishing of the final report where a determination of no archaeological potential has been made is 15 days, unless the Minister specifies a different waiting period.

Where there is Archaeological Potential

Where the proponent determines that the project area may have archaeological potential, or where the proponent has opted to proceed with an archaeological assessment without making a preliminary determination, the proponent must:

- ensure a licensed archaeologist conducts a Stage 1 and, where necessary, a Stage 2 archaeological assessment in accordance with the MCM [*Standards and Guidelines for Consultant Archaeologists*](#), dated 2011, as amended from time to time, and prepares the appropriate archaeological report(s), and ensure the report(s) are entered in the Ontario Public Register of Archaeological Reports
 - entry of the report in the Register must be confirmed in writing by MCM
- for any part of the project area that is submerged land, ensure a licensed archaeologist conduct a marine archaeological assessment and prepares a marine archaeological report, and ensure the report is entered in the Ontario Public Register of Archaeological Reports
 - entry of the report in the Register must be confirmed in writing by MCM
- publish a draft report that includes a description of the project and project area, a summary of any Stage 1 and (where applicable) Stage 2 or marine reports, any commitments made to Indigenous communities in relation to archaeological resources and the recommendations from the licensed archaeologist to mitigate potential impacts on archaeological resources, how the proponent will implement those commitments and recommendations, copies of any letters received from MCM, and a consultation record
- provide notice of the draft report to Indigenous communities, the Director and adjacent landowners and post a copy of the notice and report on the project website
- provide for a minimum of 30 days for review and comment on the draft report

- publish a final report on the project website that includes information specified in the Regulation, including a summary of comments received and any updates made to the information in the draft report
- provide notice of the final report to Indigenous communities, the Director and adjacent landowners and publish a copy of the notice and final report on the project website

The waiting period following the publishing of the final report is 35 days, unless the Minister specifies a different waiting period.

Project Changes

When proceeding with the project, proponents must implement any commitments made to Indigenous communities and any recommendations of the licensed archaeologist to mitigate impacts on archaeological resources in accordance with the final report and any addendum. If the proponent wishes to make changes to the project, such that the proponent cannot implement those commitments or recommendations in accordance with the final report and any addendum, they would be required to prepare an addendum that includes the rationale for the change. The addendum would be required to be posted on the project website and circulated to Indigenous communities and the ministry, and a 35-day waiting period would apply unless the Minister specifies a shorter waiting period.

If the location of the project changes such that it would be located on lands that were not assessed in accordance with the process above or a previous archaeological assessment that was entered into the Ontario Public Register of Archaeological Reports on or after January 1, 2011, the proponent must follow the archaeological assessment process described above in relation to any lands that were not assessed.

It should be noted that, if previously undocumented archaeological resources are discovered during construction, the proponent or person discovering the archaeological resources must cease alteration of the site immediately and engage a licensed consultant archaeologist to carry out further archaeological assessment, in accordance with section 48 of the *Ontario Heritage Act*.

What projects does this apply to?

Ontario Regulation 50/24 - Designation of Part II.3 and Part II.4 Projects, identifies which projects are subject to the new regulation and which proponents have requirements for each type of project. The projects that are subject to the AAP process are set out in sections 29, 32, 35, 37 and 38 of Ontario Regulation 50/24.

Some projects listed as subject to the AAP may appear to overlap with those listed in the MPAP designations. The AAP project list applies only if the MPAP does not apply, for instance, a project listed for MPAP may only be designated for municipalities and water and wastewater public corporations and the same project on the AAP list is designated for private sector developers.

The regulation should be reviewed carefully as other processes, if applicable, may apply (e.g., a different Class EA, Part II.3 or MPAP), provide definitions for certain terminology, or there may be an exception for certain circumstances (e.g., project is part of a *Planning Act* application).

Ontario Regulation 53/24 - General and Transitional Matters, also includes a provision which exempts from Part II.4 of the EAA projects for which an archaeological assessment has been completed and a report entered in the Ontario Public Register of Archaeological Reports after January 1, 2011, and before January 1, 2027. Otherwise, the following projects are subject to the AAP.

Shoreline / In-Water Works Projects

The following projects are subject to AAP when undertaken by a municipality:

- An activity carried out in or along a watercourse for the purpose of flood or erosion control, including:
 - Bank or slope regrading
 - Relocating, realigning or channelizing a watercourse
 - Installing rock riffles
 - Constructing revetments, rock vortex weirs or berms
- Making a change to a water crossing for the purpose of flood control
- Constructing a spillway for erosion or sedimentation control at an outfall that discharges water to a waterbody
- Constructing a fish ladder in a natural watercourse
- Making a change to a dam that would result in a change to the dam's footprint
- Enclosing a watercourse in a storm sewer

Drinking Water

The following projects are subject to AAP when undertaken by a municipality, private sector developer or water and wastewater public corporation:

- Establishing a subject* drinking water system that has a rated capacity of less than or equal to 100,000 litres per day

- Making a change to a subject* drinking water system where this would result in a new surface water source being used or the change involves adding or changing an intake pipe for an existing surface water source
- Establishing a drinking water treatment plant that has a rated capacity of less than or equal to 100,000 lpd and is part of a subject* drinking water system
- Making a change to a drinking water treatment plant that is part of a subject* drinking water system if the change would increase the rated capacity of the plant and involves construction outside of an existing building or structure

The following projects are subject to AAP when undertaken by a municipality, or water and wastewater public corporation:

- Making a change to a drinking water treatment plant that is part of a subject* drinking water system if making the change would involve acquiring additional land for the plant or require making new sewer connections or establishing a new works for disposal of process wastewater from the plant
- Establishing a distribution system if, under the *Safe Drinking Water Act, 2002*, a permit is required to establish the system and a license is required to use or operate the system**
- Making a change to a distribution system described above by extending the system** or establishing a pumping station or a drinking water storage facility.
- Making a change to a drinking water pumping station that is part of a distribution system described above if that change involves construction of a new building or structure
- Making a change to a drinking water storage facility that is part of a distribution system described above if that would involve acquiring new land for the facility
- Establishing a well to supply water to a subject* drinking water system

Sewage

The following projects are subject to AAP when undertaken by a municipality, private sector developer*** or a water and wastewater public corporation:

- Establishing a sewage treatment plant that has a rated capacity of less than or equal to 100,000 litres per day
- Establishing a sewage lagoon facility that has a rated capacity of less than or equal to 100,000 litres per day
- Establishing a sewage detention facility that, provides treatment of sewage and has a rated capacity of less than or equal to 100,000 litres per day, or that does not provide treatment of sewage

- Making a change to a sewage treatment plant or sewage lagoon facility, if making the change would, increase the rated capacity of the plant or facility and making the change involves construction outside of an existing building or structure

The following projects are subject to AAP when undertaken by a municipality or a water and wastewater public corporation:

- Establishing a sewage system, other than a subsurface sewage disposal system, that has a rated capacity of less than or equal to 100,000 litres per day
- Establishing a sewage system that is a subsurface sewage disposal system.
- Establishing a sewage collection system**
- Making a change to a sewage collection system by extending the sewage collection system** or establishing a sewage pumping station
- Making a change to a sewage pumping station, if making the change would require construction of a new building or structure
- Making a change to a sewage treatment plant or sewage lagoon facility, if making the change would, involve acquiring additional land for the plant or facility, or require construction that involves excavating previously undisturbed land
- Making a change to a sewage collection system, sewage pumping station, sewage treatment plant, sewage lagoon facility or sewage detention facility that involves adding an equalization tank

Note, the above designations only apply to sewage works that require an environmental compliance approval under the *Ontario Water Resources Act*.

Storm Water Projects

The following projects are subject to AAP when undertaken by a municipality or a water and wastewater public corporation:

- Establishing a storm water management works**
- Making a change to a storm water management works if, the change requires acquiring property to expand the site of the storm water management works, or the change requires constructing part of the storm water works on an area that is outside the area on which the existing storm water works is located**

Road-Related Projects

The following projects are subject to AAP when undertaken by a municipality or by a private sector developer where the project is for residents of a municipality:

- Constructing more than one lane kilometre of sidewalks, multi-purpose paths or cycling facilities

- Constructing a road that is more than one lane kilometre
- Reconstructing or widening a road, if the area of the reconstruction or widening is more than one lane kilometre

The following projects are subject to AAP when undertaken by a municipality:

- Constructing a storage structure that will be used for the purpose of storing de-icing materials
- Constructing a parking lot that is more than 5,575 square metres in area and that is not intended to serve a particular building
- Constructing an underpass or overpass across a road for pedestrian, cycling, recreational or agricultural use
- Constructing a grade separation or interchange
- Constructing a water crossing
- Reconstructing or making a change to a water crossing if, as a result, the water crossing will have a different footprint than the existing water crossing

The regulation sets out some exceptions that apply to road-related projects, please review the regulation carefully to determine if a project is subject.

Notes

*Subject drinking water system means that under the *Safe Drinking Water Act, 2002*, a permit is required to establish the system and a licence is required to use or operate the system.

**The designation does not apply if the works are required as a condition of approval under the *Planning Act* for a site plan, consent, plan of subdivision or plan of condominium. The designations for establishing or extending a distribution system or sewage collection works does not include any part of the distribution system or sewage collection system that is being established in a previously disturbed portion of an existing road allowance or utility corridor.

***Sewage projects designated as applicable to private sector are those that provide sewage treatment for private residences.

4. Transition to the New Regulation for Municipal Infrastructure Projects

What transition rules apply to my project?

Section 38.5 of the EAA and Ontario Regulation 53/24 – General and Transitional Matters will provide for the transition of projects that have completed or are undergoing the MCEA process when the new regulation comes into effect.

Completed MCEA Process

For projects where a MCEA Schedule B or C process has been completed and the undertaking was authorized to proceed but the project has not yet been implemented or is being carried out as of the transition date:

- proponents must implement the project in accordance with any Project File Report, Environmental Study Report and any addendum prepared under MCEA
- all requirements for proceeding with the project set out in the new regulation will apply, including the change/addendum provisions (except where an addendum process under MCEA is already underway)
- if the proponent has not substantially proceeded with the project within 10-years of the publication of the Project File Report or Environmental Study Report, the project review and addendum provisions in the new regulation would apply

These provisions would apply to all projects where a Schedule B or C process under MCEA has been completed or is underway, regardless of which process (MPAP or AAP) the project would otherwise be subject to under the new regulation.

MCEA Process Underway

For projects where a MCEA archaeological screening, Schedule B, Schedule C process is underway, but the proponent is not yet authorized to proceed with the project as of the transition date, proponents may:

1. Complete the MCEA process that is underway, or
2. Subject to the rules for termination (below), terminate the MCEA process that is underway and:
 - a) carry out the new process that would apply to a project of that type (MPAP or AAP), or

- b) if the project is not of a type that is designated as a Part II.4 project, have no further requirements under the EAA

An MCEA process is considered to be underway if the proponent has given a mandatory notice to one or more Indigenous communities or the public but is not yet authorized to proceed with the undertaking. This does not include a notice that a Master Planning process has been initiated following Approach #1 as outlined in the MCEA.

The regulation also sets out requirements that need to be satisfied in order to terminate the MCEA process.

For a change to a project for which a notice of addendum has been given under MCEA but the proponent is not yet authorized under the EAA to make the change, the MCEA addendum process continues to apply. That process cannot be terminated under the transition rules in O.Reg. 53/24.

Rules for Termination

Before a proponent may terminate a MCEA process that is already underway they must provide a notice of termination to the Director within 90 days of the transition date (January 1, 2027) indicating the intent to terminate, subject to eligibility.

If the project would no longer be subject to the EAA or is currently subject to MCEA Schedule B or C process and would be subject to the AAP after the MCEA process is terminated, the proponent must, before giving a notice of termination:

- provide a notice to each Indigenous community and person that has been contacted by the proponent under the applicable class EA process or that, in the opinion of the proponent, would be interested
- allow for a minimum of 30 days to provide comments

The regulation sets out the requirements that must be included in the advance notice.

A proponent would not be eligible to terminate the MCEA process that is underway if:

- a notice of completion has been issued under the applicable class EA prior to the transition date,
- the proponent has provided written notice under 18 (1) (a) of Ontario Regulation 50/24 that they will carry out the undertaking in accordance with the applicable class EA,
- concerns are raised by an Indigenous community in written comments submitted in response to an advance notice,

- a Minister's order request has been submitted under subsection 16 (6) of the EAA and no decision has been made on the request, or
- an order has been made under subsection 16 (3) of the EAA.

Projects that are completed in accordance with the MCEA (whether by proponent choice or because they are not eligible to terminate) would be required to be implemented by the proponent in accordance with any Project File Report or Environmental Study Report prepared under MCEA and would subsequently be subject to the change/addendum and 10-year review provisions set out in the new regulation.

Projects that were previously exempt from or not subject to the EAA as of the transition date but are on the Part II.4 project list would not have any requirements under EAA where the proponent has substantially proceeded with the project.

5. Resources

The new and amended regulations under the EAA can be accessed here: [Environmental Assessment Act, R.S.O. 1990, c. E.18 | ontario.ca](#)

The Ministry is also developing a more comprehensive guidance document that will be made available through this [website](#).

For more information on the Environmental Assessment program, please see our website: [Environmental assessments | ontario.ca](#)

Who to contact

For additional information about the *Environmental Assessment Act* or the new regulation please contact the Environmental Assessment and Permissions Modernization Team at: EAModernization.MECP@ontario.ca.

September 10, 2026

Dear Head of Council,

I am writing to advise that the content of proposed regulations under the [Municipal Accountability Act, 2026](#), which received Royal Assent on June 2, 2026, is now posted on Ontario's regulatory registry for public comment.

The Act represents a significant step toward strengthening accountability and public confidence in local government. If the changes made by this Act are brought into force, the Ministry of Municipal Affairs and Housing is proposing regulations that would:

1. Establish a standardized municipal code of conduct for members of council and certain local boards;
2. Establish standardized municipal integrity commissioner inquiry processes; and
3. Establish education and training requirements for municipal integrity commissioners and for members of councils and certain local boards.

I value your perspective as Head of Council and encourage you to provide comments through the Regulatory Registry on behalf of your municipality, including any views or feedback from members of council: [Proposal for Regulations to Establish a Standardized Municipal Code of Conduct; Municipal Integrity Commissioner Processes and Education and Training Requirements | regulatoryregistry.gov.on.ca](#)

The proposal is open for public comment until October 2, 2026. Feedback will help inform the development of these regulations and support their effective implementation for the start of the new municipal council term on November 15, 2026.

If you have any questions regarding the proposal, please contact Robert Dodd, Chief of Staff, Minister's Office, Ministry of Municipal Affairs and Housing
Robert.Dodd@ontario.ca.

I look forward to receiving your input.

Sincerely,

A handwritten signature in blue ink that reads "Robert J. Flack".

Hon. Robert J. Flack
Minister of Municipal Affairs and Housing

BY-LAW NO. 2026-51

**BEING A BY-LAW TO ESTABLISH A POLICY RESPECTING THE CIRCUMSTANCES
AND MANNER IN WHICH NOTICE WILL BE PROVIDED TO THE PUBLIC, AND REPEAL
BY-LAW 2007-113**

WHEREAS pursuant to Section 270 of the Municipal Act, 2001, S.O. 2001, c. 25, as amended, a municipality shall adopt and maintain policies with respect to the circumstances in which the municipality shall provide notice to the public and, if notice is to be provided, the form, manner and times notices shall be given;

AND WHEREAS it is deemed expedient to set out reasonable minimum notice requirements for those actions for which requirements are not prescribed under the provisions of the said Act or its regulations;

NOW THEREFORE the Council of The Corporation of the Municipality of West Elgin hereby enacts as follows:

1. In this By-law:

- (a)** "Act" means the Municipal Act, 2001, S.O. 2001, c. 25, as amended;
- (b)** "Clerk" means the Clerk of The Corporation of the Municipality of West Elgin;
- (c)** "Council" means the Council of The Corporation of the Municipality of West Elgin;
- (d)** "Form" means the format of the notice;
- (e)** "Mailed" means mailed by prepaid first class mail;
- (f)** "Municipality" means The Corporation of the Municipality of West Elgin;
- (g)** "Prescribed requirements" means the requirements prescribed by the Act or its regulations.

2. Schedule "A" attached forms part of this By-law and is hereby adopted as reasonable minimum procedures for the giving of notice as required under the Act.

MANNER OF NOTICE

3. Where notice is required, the Clerk shall cause such notice to be published in the London Free Press and to be posted on the Municipal website in the form and manner and at the times indicated in Schedule "A" to this By-law unless:

- (a)** Council directs that other public notice is to be given as Council considers adequate in the circumstances;
- (b)** No additional notice will be required for subsequent meetings where a matter has been deferred or referred to a subsequent meeting by Council;
- (c)** Notwithstanding Section 2 of this By-law, a notice is deemed to have been given in accordance with the requirements of Schedule "A" of this By-law even if there are times when the Municipal website is not accessible to the public.

TIME OF NOTICE

4. Notice shall be provided in the time frame prescribed in the Act and, if not so prescribed or indicated in Schedule "A" to this By-law, notice shall be given at least seven (7) days immediately preceding consideration of the matter by Council.

FORM OF NOTICE

Unless otherwise prescribed in the Act or its regulations, where notice of intention to pass a by-law or notice of a public meeting is required to be given, the form of the notice shall include the following information:

- (a) Section of the Act or its regulations that apply to the matter;
- (b) A description of the purpose of the meeting or the purpose and effect of the proposed by-law;
- (c) Where the matter relates to a defined location, sufficient particulars of the location such as reference to a municipal address, legal description or key map;
- (d) Date, time and location of the meeting;
- (e) The name and address of the person who will receive written comments, including the deadline for receiving such comments, on the matter which is the subject of the meeting or on the proposed by-law.

FINANCIAL

5. Normal operating costs incurred prior to the adoption of the annual budget shall not require notice, and approval of such expenditures shall be deemed ratified upon the adoption of the annual budget.
6. Notice is required if a proposed amendment within the departmental budget will change the total expenditures approved for the department in that current year.
7. Notice shall be provided when a proposed change in the total expenditures in the current budget exceeds \$50,000.00.

GENERAL

8. Where separate by-laws have been enacted in accordance with provisions contained in the Act, the notice provisions set out in such by-laws shall prevail.
9. No notice shall be required under this By-law where the provision of notice will interfere with the ability of Council to conduct business with respect to a matter permitted for a closed session under Section 239 of the Act.
10. Nothing in this By-law shall prevent the Clerk from using more comprehensive methods of notice or providing for a longer notice period.

EMERGENCY PROVISION

11. If a matter arises which, in the opinion of the Clerk, in consultation with the Mayor, is considered to be of an urgent nature and which could affect the health or well-being of the residents of the Municipality of West Elgin, or if so advised by a Provincial Ministry, the notice requirements of this By-law may be waived and the Clerk and the Mayor shall make their best efforts to provide as much notice as is reasonable under the circumstances.

REPEAL

12. That By-law No. 2007-113 is hereby repealed.

EFFECTIVE DATE

13. This By-law shall come into force and take effect on the date of its final passing.

Read a first, second, and third time and finally passed this 11th day of August, 2026.

Richard Leatham, Mayor

Terri Towstiuc, Clerk

MUNICIPALITY OF
West Elgin

The Corporation of The Municipality of West Elgin

By-Law No. 2026-54

Being a by-law to provide for reduced hours on voting day in institutions and retirement homes (Beattie Manor).

Whereas Section 46(3) of the *Municipal Elections Act, S.O. 1996*, as amended, provides that a municipal council shall pass a by-law with respect to reduced voting hours in voting places in institutions or retirement homes as described in subsection 45(7) of the said Act, where the voting place is only for use of residents;

Now therefore the Council of the Municipality of West Elgin enacts as follows:

1. That the voting hours at the Beattie Manor Retirement Residence on Election Day Monday October 26, 2026 be between the hours of 1:00 pm and 3:00 pm.
2. That this By-Law comes into force and effect upon the final reading thereof.

Read a first, second, and third time and finally passed this 24th day of September 2026.

Richard Leatham, Mayor

Terri Towstiuc, Clerk

MUNICIPALITY OF **West Elgin**

The Corporation of The Municipality of West Elgin

By-Law No. 2026-55

Being a By-Law to confirm the proceedings of the Regular Meeting of Council held on September 24, 2026.

Whereas Section 5(1) of the Municipal Act, 2001, S.O. 2001, c.25, as amended, the powers of a municipality shall be exercised by council; and

Whereas Section 5(3) of the Municipal Act, the powers of Council shall be exercised by by-law; and

Whereas it is deemed expedient that proceedings of Council of the Corporation of the Municipality of West Elgin as herein set forth be confirmed and adopted by by-law.

Now therefore the Council of the Municipality of West Elgin enacts as follows:

1. That the actions of the Regular meeting of Council held on September 24, 2026, in respect of each recommendation, motion and resolution and other action taken by the Council at this meeting, is hereby adopted and confirmed as if all such proceedings were expressly embodied in this by-law.
2. The Mayor and proper officials of the Corporation of the Municipality of West Elgin are hereby authorized and directed to do all things necessary to give effect to the action of the Council referred to in the preceding section hereof.
3. The Mayor and Clerk are hereby authorized and directed to execute all documents necessary in that behalf and to affix the Seal of the Corporation of the Municipality of West Elgin.

Read a first, second, and third time and finally passed this 24th day of September, 2026.

Richard Leatham, Mayor

Terri Towstiuc, Clerk
